IRON CLUB HEAD

Abstract:

Abstract of JP2000093566

PROBLEM TO BE SOLVED: To provide an iron club head made of a metal, securing a wide sweet area and having a low center of gravity so that a ball is easy to lift, allowing even a skilled player to use it without discomfort. **SOLUTION:** In a back-cavity-type iron club head 1 made of a metal, a recess part is formed in the face part of a head body 2 and a face insert member 7 having a smaller specific gravity than the metal forming the head body 2 is mounted in the recessed part. A through hole 6 is provided from the bottom face part of the recess part of the face part to a back cavity part 5, and the face insert member 7 having a projecting part 7A smaller than the through hole 6 and similar in shape to the through hole 6 is fitted into the through hole 6 and integrated.
